1 GATE CS 2015 Set-1 QUESTION No. 10

The probabilities that a student passes in Mathematics, Physics and Chemistry are m , p and c respectively. Of these subjects, the student has 75% chance of passing in at least one, a 50% chance of passing in at least two and a 40% chance of passing in exactly two. Following relations are drawn in m , p and c :

- (i) $p + m + c = \frac{27}{20}$
- (ii) $p + m + c = \frac{13}{20}$
- (iii) $p \times m \times c = \frac{1}{10}$

- 1) Only relation (i) is true
- 2) Only relation (ii) is true
- 3) Relations (ii) and (iii) are true
- 4) Relations (i) and (iii) are true

2 SOLUTION

p	Probability of passing in physics
m	Probability of passing in mathematics
c	probability of passing in chemistry

TABLE 4: Probability of passing

Let X be a Random variable that denotes number of subjects the student passes.

So, $X \in 0, 1, 2, 3$

Given,

$$\Pr(X = 0) = 1 - \Pr(X \geq 1) = 1 - 0.75 \quad (1.1)$$

$P(X \geq 1)$	0.75
$P(X \geq 2)$	0.50
$P(X = 2)$	0.40

TABLE 4: $P(X)$

$$\Rightarrow \Pr(X = 0) = 0.25 = (1 - m)(1 - p)(1 - c) \quad (1.2)$$

$$\Rightarrow m + p + c + mpc - mp - cm - pc = 0.75 \quad (1.3)$$

$$\Pr(X = 2) = mp(1 - c) + pc(1 - m) + cm(1 - p) = 0.40 \quad (1.4)$$

$$\Rightarrow mp + pc + cm - 3mpc = 0.4 \quad (1.5)$$

$$\Pr(X \geq 2) = \Pr(X = 2) + \Pr(X = 3) = 0.5 \quad (1.6)$$

$$\Rightarrow \Pr(X = 3) = pmc = 0.1 = \frac{1}{10} \quad (1.7)$$

\therefore **Relation (iii) is TRUE**

Substituting (1.7) in (1.5),

$$\Rightarrow mp + cm + pc = 0.7 \quad (1.8)$$

and substituting (1.8) and (1.7) in (1.3)

$$\Rightarrow m + p + c = 1.35 = \frac{27}{20} \quad (1.9)$$

\therefore **Relation (i) is TRUE**

From this, the final answer we get is **Option 4**

Fig. 4: Probability($P(X)$) of passing X subjects
