## 1 CSIR - UGC 2014 DEC Q.103

Suppose X is a Random Variable such that E(X) = 0,  $E(X^2) = 2$  and  $E(X^4)=4$ . Then

- 1)  $E(X^3)=0$
- 2)  $\Pr(X \ge 0) = \frac{1}{2}$
- 3)  $X \sim N(0,2)$
- 4) X is bounded with Probability 1.

#### 2 SOLUTION

Let X be a Random variable. Compute Variance of  $X^2$ , Let  $Y = X^2$ 

$$\sigma(Y) = E(Y^2) - (E(Y))^2$$

$$= 4 - 2^2$$

$$= 0$$

$$\implies \sigma^2(X^2) = 0$$

$$\sigma^2(Y) = E((Y - E(Y))^2) = 0$$
(1)

We Know  $Z = (Y - E(Y))^2 \ge 0$ If E(Z) = 0 then it means Z = 0

$$\implies Y = E(Y)$$

$$X^2 = E(X^2) = 2 \tag{*}$$

 $\therefore$  X is a random variable such that  $X^2$  is constant. Given  $E(X^2) = 2$ ,

$$E(X^{2}) = \Sigma X^{2} \Pr(X)$$

$$= X^{2} \Sigma \Pr(X)$$

$$= X^{2} (\because \Sigma \Pr(X) = 1)$$

$$X^{2} = 2$$

$$\implies X = \pm \sqrt{2}$$
(2)

Given E(X) = 0,

$$E(X) = \Sigma X \Pr(X) = 0$$

$$\sqrt{2} \Pr(X = \sqrt{2}) - \sqrt{2} \Pr(X = -\sqrt{2}) = 0$$

$$\implies \Pr(X = \sqrt{2}) = \Pr(X = -\sqrt{2})$$
 (3)

Also, Sum of Probabilities is 1,

$$\Rightarrow \Pr(X = \sqrt{2}) + \Pr(X = -\sqrt{2}) = 1$$

$$\Rightarrow \Pr(X = \sqrt{2}) = \frac{1}{2} \quad (4)$$

$$\Rightarrow \Pr(X = -\sqrt{2}) = \frac{1}{2} \quad (5)$$

1) **Option 1**:  $E(X^3) = 0$ ,

$$E(X^{3}) = \Sigma X^{3} \Pr(X)$$

$$= X^{2}.\Sigma X \Pr(X)$$

$$= X^{2}E(X)$$

$$\implies E(X^{3}) = 0$$

**Option 1** is a **correct** answer

2) **Option 2**: 
$$\Pr(X \ge 0) = \frac{1}{2}$$
,  

$$\Pr(X \ge 0) = \Pr(X = \sqrt{2}) = \frac{1}{2}$$

$$\implies \Pr(X \ge 0) = \frac{1}{2}$$

Option 2 is a correct answer

3) **Option 3**:  $X \sim N(0,2)$ Let  $\mu$  be the mean of X

$$\mu = E(X)$$

$$\implies \mu = 0$$

$$\sigma^{2}(X) = E(X^{2}) - (E(X))^{2}$$

$$= 2 - 0^{2}$$

$$\implies \sigma^{2}(X) = 2$$
(7)

But Random Variable X is defined for  $\pm \sqrt{2}$  only.

This means that distribution of X is not continuous, but discrete.

Option 3 is a WRONG answer

4) **Option 4**: X is bounded with probability 1, Eq. (4) and (5) show that  $X \in (-\sqrt{2}, \sqrt{2})$  with Probability 1.

**Option 4** is a **correct** answer

So, only Options 1, 2 and 4 are correct
